

**DO NOT USE ON TRUCKS/MACHINES MANUFACTURED BEFORE 2014**

# Step 1. How to Tune Your Truck with the VLOMINGO

**SUPPORTED ECM/EMS: TRW EMS 2.3 AND TRW EMS 2.4**

1. Disconnect both harnesses (**A,B**) from the **ECM/EMS** on your truck.

2. Connect the **VLOMINGO** adapter to the "**B**" socket on the **ECM/EMS**.

Connect the power cable to the **VLOMINGO** adapter only after assembling the entire connection circuit. If after connecting the VLOMINGO adapter, the **ECM/EMS** module does not initialize in the **Mochester App**, reconnect the power cable to the VLOMINGO adapter.

3. Login to your account in the **Mochester App** and make sure the connection to the **ECM/EMS** module is established.

4. Select services requiring the **VLOMINGO** Adapter.

5. Confirm your order with **OTP**.

6. Wait until tuning process is finished.

7. The first stage is completed.

8. Unplug the **VLOMINGO** from the **ECM/EMS**.

# Step 2. How to Tune Your Truck with the VLOMINGO

**THIS STEP WILL NOT REQUIRE THE VLOMINGO TUNING ADAPTER**

**SKIP THIS STEP IF YOU ARE TUNING THE ECM/EMS ON A TABLE WITHOUT THE TRUCK**

However, if you reinstall the **ECM/EMS** module back into the truck, **perform Step 2.** Otherwise, skipping this step may result in an emission warning message on the dashboard.

**TO CONTINUE PROCESSING YOUR ORDER, FOLLOW THE INSTRUCTIONS BELOW**

1. Connect both harnesses (**A,B**) to the **ECM/EMS** module on your truck.

2. Connect **ONLY** the **RP1210** adapter to your laptop and the **OBD** socket in the cab.

3. Turn the key to the **ACC/ON** position to continue order processing.

4. Continue working with the order in the Mochester App.

The order processing will continue **automatically** once the entire **truck/machine** is successfully connected through the **OBD** port.

5. Wait for the order completion report.

6. Enjoy
